SKILLS

Languages: Go,Python, Ruby, Javascript, HTML, CSS
Frameworks/Libraries: gin,Django, Rails, React, Node.js, Mongoose, Express.js, jQuery
Databases: MongoDB, PostgreSQL, DynamoDB,SQL, MYSQL

PROJECTS

Bonjour, What's Up? // github.io/bonjourwhat-sup-/
A responsive web application built using HTML/CSS and JavaScript/jQuery. The application uses a weather API to help travellers determine the weather conditions of New York and Paris. A community intake form asks users to enter their contact info such as name, email and current city at the bottom of the page. Moreover, the user will be able to enter the cities they would like to see compared via a survey form at the bottom of the page.

Shoppe // github.io/shoppe/
A comprehensive full stack application built using Node,js, Express.js, Mongoose and EJS deployed via Heroku. It allows users to view street style pictures and purchase the items seen in the pictures. Users are also able to suggest new items for the Shoppe to carry. Lastly, login and sign up functionality was added with encrypted passwords and authorization flow.

BackendHomemade // backendhomemade.herokuapp.com/
A responsive full stack application built using Ruby, Rails, PostgreSQL, React and CSS deployed via Heroku. The application has full CRUD functionality and will continue to be built upon as a family recipe app.

SELECTED EXPERIENCE

CEO & Co-Founder // January 2016 - November 2020
GayStay // New York, NY
- Developed a responsive tech platform and strategy to house our host inventory and provide exceptional user experiences.
